

Corum 9230

Product Information

FEATURE

- Low irritation
- Low odour
- Long lasting cooling effect

INCI NAME

Menthol (and) Menthyl Lactate

CAS No.

2216-51-5 (and) 59259-38-0

EINECS No.

218-690-9 (and) 261-678-3

STRUCTURE

CHARACTERISTICS

Appearance	Clear liquid
Odour	Faintly mint

SPECIFICATIONS

Colour (APHA)	<100
Free acidity (% lactic acid):	Max. 5
Saponification value (mg KOH/g):	135 - 155
Specific gravity (20C):	0.94 - 0.98
Specific rotation (5% in alcohol, $[\alpha]^{20}_D$)	Max. -62°
Refractive index (n^{20}_D)	1.45 - 1.47

DESCRIPTION

Corum 9230 is a cooling ingredient. It can be used as active cosmetic ingredient in all products.

Corum 9230 is a menthyl derivative; it possesses a very faint inherent odor and long lasting cooling effect.

STORAGE

Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances.

APPLICATIONS

Corum 9230 can be mixed easily with perfume oil or glycol solvents, when adding to shampoos, shower gels, or foam bath. The O/W emulsions gels can rapidly causes hydration of the skin, enhances the effectiveness of Menthyl Lactate.
