

Azeclair® P

Product Information

FEATURE

- Brightening agent
- Sebum normalizing
- Non-irritating

INCI NAME

Potassium Azeloyl Diglycinate

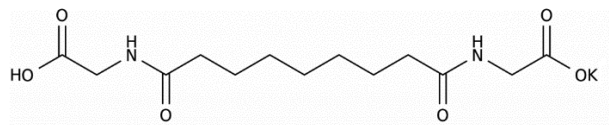

CAS No.

477773-67-4

EINECS No.

470-270-6

STRUCTURE

CHARACTERISTICS

Appearance

White to off-white powder

Odour

Typical

SPECIFICATIONS

pH value (30% aq.)

6.0 - 8.0

Purity by HPLC (area%)

95 Min.

KCl (%)

5 Max.

Loss on drying (%)

10 Max.

DESCRIPTION

Azeclair® P is a cosmetic active catered for oily and acne-prone skin with high efficacy in sebum normalizing, skin brightening, hydrating and anti-pollution. It comes in powder form and is free of preservatives. Azeclair® P is ameliorated from its original liquid counterpart to reduce carbon footprint through our commitment to science-based targets and the UN SDGs. It is gentle, non-irritating to skin and mucosa.

STORAGE

Protect from contacting with air, light, heat and moisture.

APPLICATIONS

Azeclair® P can be used in aqueous systems such as cleansers, clear solutions, gels, gel-emulsions and O/W emulsions. Stable at the pH range from 5 to 11. Recommended dosage: from 0.5% to 5%.
