

**Product Information****FEATURE**

- 100% plant-derived
- Very light and highly spreading emollient
- Hair care, Skin care, Sun care cosmetics

**Ecokane™ MB****INCI NAME:**

C9-12 ALKANE

**CAS No. / EINECS No.**

112-40-3 / 203-967-9

**STRUCTURE****CHARACTERISTICS**

Appearance Clear, colorless liquid

**SPECIFICATIONS**

Colour (AHPA)	20 max.
Purity (Alkanes) (%)	98.00 min.
nC12	97.00 min.
nC14	1.00 max.
nC10	0.50 max.

**DESCRIPTION**

Ecokane™ MB is a 100% plant-derived sustainable emollient, with RSPO MB certified, non-polar, very lightweight, highly spreading and partially volatile properties. It serves as a readily biodegradable and eco-friendly alternative to petroleum-derived isododecane and synthetically-derived cyclomethicones (especially D4, D5, D6).

**STORAGE**

Store in a cool, dry place.

**APPLICATIONS**

Ecokane™ MB is proven alternatives to controversial silicones in personal care applications. It can be used in a wide range of cosmetic formulations, including hair care, skin care, sun care, color cosmetics, and antiperspirant applications, imparting an exceptional after-feel and anti-whitening properties. It absorbs quickly, provides a dry silicone like initial feel and a unique after-feel that cascades from silky to powdery, making it suitable to reduce the greasiness of formulations.
