DESCRIPTION

Peptides are miniature fragment of skin protein; they are messengers signaling dermis for synthesizing the material necessary for the skin.

Tricoll™ MB is a synthetic lipopeptide, conjugating long chain fatty acid to improve skin penetration and skin affinity. Tricoll™ MB contains three amino acids. It initiates the stimulation of collagen and glycosaminoglycan synthesis and strengthens the connective tissue. It helps the skin retain its natural firmness.

STORAGE

Protect from contacting with light, heat and moisture. Store in closed containers at room temperature. Shake well before use.

APPLICATIONS

Tricoll™ MB is commonly used in the skin care lotion/cream/serum, such as skin repair, skin firming, anti-age and eye care.
