

# Azeclair®

## Product Information

### FEATURE

- Whitening agent
- Sebum normalizing
- Non-irritating

### INCI NAME

Potassium Azeloyl Diglycinate

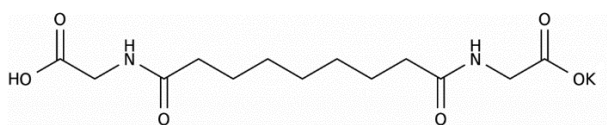

### CAS No.

477773-67-4

### EC No.

686-756-8

### STRUCTURE

### CHARACTERISTICS

Appearance	Clear liquid
Odour	Odorless
Solubility	Completely soluble in water

### SPECIFICATIONS

Color (APHA)	300 Max.
pH value	6.5 - 7.5
Solid %	28.0 - 32.0
KCl %	3.5 Max.
Purity by HPLC (area%)	95 Min.

### DESCRIPTION

Azeclair® is a multifunctional ingredient as sebum normalizing, skin lightening and hydrating - elasticizing agent. It is non-irritating to skin and mucosa.

### STORAGE

Protect from contacting with air, light, heat and moisture.
